

# Operating Instructions

## Shower

### Shower (Electric)

- Pull power cord (where necessary)
- Select pressure setting by turning control to low/medium/high
- Select temperature by turning control: blue = cold, red = hot
- Press the start/stop button (settings can be adjusted when shower is on)
- To stop, press the start/stop button and pull on power cord (where necessary)

### Shower Mixer (Gas)

- Turn the flow lever until desired force of water is obtained – this will automatically turn your shower on
- Turn the temperature knob until the desired temperature is reached
- To stop, turn the flow lever back to the starting position

### Safety:

- Ensure shower is fully turned off at the end of every use
- Ensure en-suite door is closed when showering as steam will set the smoke alarms off
- Ensure there are no electrical appliances in or around your shower at any time

**If you are still unclear on the use of any appliance please speak to a member of staff.**

**If any appliance does not work – NEVER try to fix it yourself, always report it to reception.**

**And remember NEVER turn on an appliance and leave it unattended.**
